EDUCATION

University of Oregon - Eugene, OR

Bachelor of Science, Computer Science

CLASS OF MARCH 2016

WORK EXPERIENCE)

California Department of Social Services - Sacramento, CA

Software Engineer

OCTOBER 2016 - PRESENT

- Developing, designing, and maintaining web apps that help millions of Californians in need.
- Scrum Agile methodology using mostly C#, AngularJS, SQL Server, ASP.NET, HTML5, JavaScript, jQuery, and Bootstrap.
- Developing and maintaining app used by over 150,000 people that coordinates background checks, payments processing, and concurrent updates on multiple systems while maintaining security and public visibility of critical data.
- Developed successful SaaS for legislative reports used by various California state health and human services departments.
- Engaging with stakeholders and users to develop requirements, assess needs, and support the project after completion.
- Leading software development lifecycle by analyzing requirements, designing systems, writing code, coordinating testing, and maintaining apps.

The Walt Disney Company - Seattle, WA

Software Engineering Intern

JUNE 2015 - SEPTEMBER 2015

- Developed a keystore management security web application as part of an identity and access management solution for ABC News' main content management system.
- Wrote application using Java, an internal Groovy MVC web framework, and MySQL.
- Developed features for creating, storing, managing permissions, retrieving, deleting, and rotating cryptographic keys for symmetric and public key infrastructure.

iD Tech Camps, University of Washington - Seattle, WA

Software Engineering Instructor

JUNE 2014 - AUGUST 2014

- Inspired high school students to pursue software engineering by teaching courses in Java, C++, object-oriented programming, and GUIs with Swing.
- Mentored students in developing personal software projects; pair programmed and debugged with them as needed.

University of Oregon ResNet - Eugene, OR

Connection Technician

AUGUST 2012 - SEPTEMBER 2012

- Configured wireless networks, employed network diagnostics, and monitored network security services for students living in campus residence halls.

SKILLS

LANGUAGES: Java, C#, Python, SQL, JavaScript, HTML5, CSS

TOOLS/Frameworks: Scrum (Agile), Linux, Git, TFS, ASP.NET, Flask, jQuery, Bootstrap, Angular 1 (AngularJS), MySQL, MS SQL Server, Apache, JUnit, Amazon Web Services, Visual Studio, JetBrains IDEs, Eclipse, user interface design

ABILITIES: Comfortable working in a fast-paced environment that requires quickly learning new programs and tools; able to communicate with stakeholders, users, and teammates effectively; enthusiastic about overcoming challenges and always looking to grow.

TRAININGS

Dynamics 365: Development - Microsoft

FEBRUARY 27, 2018 - MARCH 1, 2018

ASP.NET Web API Essentials Using C# - ISInc

JUNE 26, 2017 - JUNE 27, 2017

Agile Essentials Training and Application - UC Davis Extension

JUNE 14, 2017 - JUNE 15, 2017

Angular 2 with TypeScript - ISInc

MARCH 6, 2017 - MARCH 10, 2017

Visual Studio Application Lifecycle Management: TFS Essentials - Microsoft

FEBRUARY 28, 2017 - MARCH 2, 2017
